

Hilton Melbourne South Wharf selects Onity HT24 electronic lock system

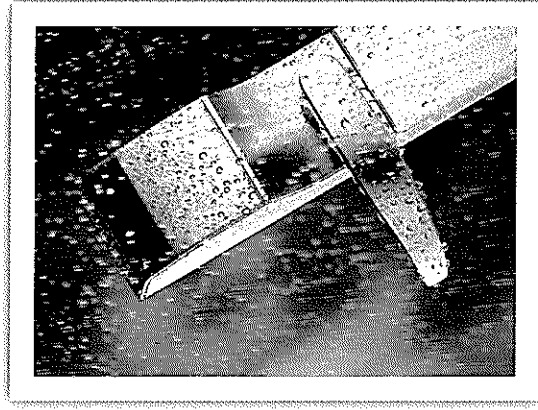

The Hilton South Wharf will comprise 364 guest rooms (including 26 suites and an additional 32 serviced apartments), with an average of 35 sqm for guest rooms and over 71 sqm for suites. With spectacular city skyline and river views, the guest rooms will feature soft tones and striking wood interiors and the latest technology in-room entertainment and communication facilities. An exclusive Executive Club and Lounge complete with private business centre facilities will be available and guests will have access to a state-of-the-art Precor Fitness Centre.

Offering exceptional solutions and dependable support, Onity is proud to be associated with the new Hilton Melbourne South Wharf opening in mid April 2009. With a sales and service network covering 115 countries worldwide, the company is a potent mix of reliable service, intelligent systems and innovation.

For the Hilton Melbourne South Wharf, Onity provided the Onity HT24 electronic locking system to complement the hotels contemporary design and décor. Set in the heart of South Wharf, an area set to become Melbourne's newest business and dining

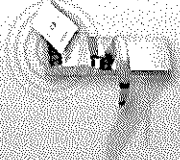

precinct, the stylish Hilton Melbourne South Wharf hotel is located conveniently close to the airport and the cosmopolitan city centre.

Whether you have a 396 rooms like the Hilton Melbourne South Wharf a dozen rooms or 6,000, the Onity HT24w Electronic Locking System can take you where you need to be. The Onity HT24w is brilliantly designed, yet ingeniously simple to use. Your staff can perform at optimum efficiency, and your guests will appreciate your making their personal comfort and security a top priority.

The Onity HT24w system offers the features you need, with the added advantage of Onity world-renowned reputation for customer support. The Onity HT24w system operates with the Onity magnetic stripe electronic lock. All Onity products are backed by Onity's warranty and our commitment to provide the highest standards of service for our customers.

Onity combines innovative technology and dependable service with over twenty years of experience to provide the most advanced electronic locking systems in the industry today. With over 3.7 million electronic locks installed worldwide, Onity electronic locking systems are found at over 22,000 properties in 115 countries. Onity, one of the world's leading providers of electronic locking solutions, is part of UTC Fire & Security, a unit of United Technologies Corp. (NYSE:UTX).

In addition to locks, Onity is also a leading provider of electronic safes, mini-bars and energy management systems with some exciting new products to be launched in 2009 including CodePro and Advance RFID. CodePro is a PIN code-based electronic locking system that allows managers or owners to instantly and remotely provide access to specific properties for specific periods of time, without the need for a key or keycard, offering an unheard of level of service in property management. While Advance RFID is an extension to the traditional accommodation lock but with improvements in technology this lock will be operated using mifare card readers allowing for further integration with property management systems.
