Onity Electronic Locking Solutions Achieve Prestigious ANSI/BHMA Certification

Onity raises the bar of quality in the hotel security industry, as their hospitality electronic locks pass the rigorous testing procedures necessary to become BHMA Certified®.

Onity (formerly TESA Entry Systems, Inc.), the leading global provider of electronic control and security solutions for the lodging industry, is offering hospitality locking solutions that have been certified as compliant with the Builders Hardware Manufacturers Association (BHMA)/American National Standard Institute (ANSI) A156.25 grade 1 standard for electrified locking devices. This prestigious certification has been achieved by the Onity ADVANCE electronic lock model, which is specifically designed for hospitality applications.

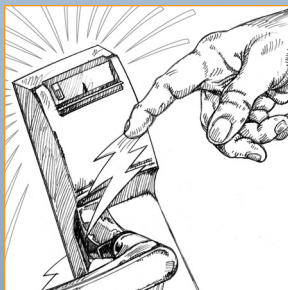

SECURITY

Escutcheon Tension Test
Withstands at least 3600 lbs. of force pulling on the lock, without pulling the escutcheon away from the door surface.

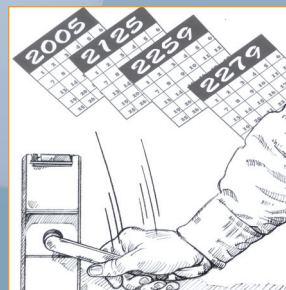

TAMPER RESISTANCE

Escutcheon Impact Test
Withstands at least 10 blows with up to 75 lbs. of blunt force, without compromising the security of the lock.

SHOCK RESISTANCE

Electrostatic Shock Test
Withstands up to 20,000 volts of static electricity applied to the lock escutcheon, without affecting lock operation.

LIFE EXPECTANCY

Lock Cycle test
Endures up to 1 million openings, representing an expected life cycle of at least 273 years with average hotel use of 10 openings daily.

We put you in control.
