Onity

The Onity OS200 in-room safe is an excellent choice for hotels looking for a reliable safe designed to securely store laptops, tablets, purses or other valuables. A backlit LED button push is guest friendly, with 3, 4, 5, or 6-digit PIN code options.

The OS200 safe comes with front-opening door and a version is available large enough to accommodate 17" laptops. It is also available in a top-opening design which can be easily hidden in a desk or side table, or mounted on a pedestal for in-closet installations. The OS200 safe is available in white or black and features an on-screen low battery warning and audit tracking.

OS200 safes are equipped with a safe on hold function. If an incorrect code is entered four consecutive times, the safe will enter a shutdown, or hold, status for a programmable number of minutes.

OS200
